DETAILED ACTION

Response to Amendment

The rejection of claims 1, 4-6, and 8-12 under 35 U.S.C. 103(a) as being unpatentable over Flynn 3,901,833 is withdrawn in view of applicants' arguments.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 4-6, and 8-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Adam et al, 4,524,181 (Adam).

Adam teaches a method of coating a glass substrate comprising providing a glass substrate, applying coating composition of the type contemplated by applicants of a solventless epoxy resin composition formed from a reaction product of epichlorohydrin and at least one bisphenol A, a hardener, water and optional additives, as required by claims 1 and 6. See column 4, line 28-30, column 13, lines 3-30 and Example 4. Also, claims 6, 8, 10, and 12 are product-by-process claims, wherein patentability depends solely on the product itself.

Therefore, the teachings of Adam anticipate the invention as claimed in present claims 1, 4-6, and 8-12.

Response to Arguments

Art Unit: 1774

3. Applicant's arguments with respect to claims 1, 4-6, and 8-12 have been considered but are moot in view of the new ground(s) of rejection.

No claims are allowed.
